

Identifying HUC 12s

Positive Characteristics

- Watershed with intrinsic public value/awareness
- Headwater regions of the watershed
- High runoff & localized flooding observed during rainstorms
 - Damages to property – residential, commercial, & repetitive crop damages
 - Washed out / impassable roadways
- Team of diverse stakeholders, technical expertise and local leadership
 - Local, state and federal organizations
- Watershed projects, past and proposed
- Landowner and producer willingness to participate
